Create a Search Box
These easy instructions will help you add a search box to your Web site. A search box is a perfect tool for navigation bars. If you want to create a search results page, you must use the Create Search Results tool instead.
STEP 1. Which search box looks best?
Pull-down preview customize
Radios preview customize
Standard preview customize
STEP 2. What is the URL of the page where results will be displayed?
You need to create your own Web page where the results can be displayed. You also need to add Jittersearch to that Web page with the Create Search Results tool Type the URL of your search results Web page here Then click the Update button.
results URL http://helpdesk.gwu.edu/helpde
Update
STEP 3. Copy and Paste
Copy and paste the HTML code from the box below to your own Web page. Be sure to copy everything exactly.
<script src="http://my.jittersearch.com/import.js?username=h
